

International Journal of Sustainable Economy (IJSE)

(ISSN print: 1756-5804, ISSN online: 1756-5812 www.inderscience.com/ijse)

At the beginning of 21st century the sustainability concept was mainly a basis for developing policies consistent with a continued use of resources into the future without causing environmental crisis. But the situation has evolved, and the global economic crisis in 2009 was the ultimate consequence of short-term economic thinking. We need a new form of economic development, addressing the needs of the present without undermining the needs of the future. The *International Journal of Sustainable Economy (IJSE)* addresses sustainability issues within economic theory and analysis.

The *International Journal of Sustainable Economy* is listed in the:
