

NEW developments in GIS management software, data management, 3D geological modelling and mine production management software

You are invited to attend an informative ONE DAY SEMINAR on new tools and techniques for the exploration and mining industry. The focus of the seminar will be 3D geology, mine modelling and mine production software which lowers costs, drives production and increases productivity. The software and related consultancy services also allow for the effective use of historical data, as well as the ability to generate JORC and other internationally recognised compliant resource estimations.

When Monday 28 March, 2010
Where Multimedijalna Sala Univerziteta U Tuzli (University of Tuzla)
Ulica Tihomila Markovica 1, 75 000 Tuzla, Bosna i Hercegovina
Time 8.30am registration (9.00am start) - 5.30pm
Presenters Micromine: James Hogg, MICROMINE Regional Manager, Europe
Mark Butcher, Consultant and GIS Specialist
Andrew Rogers, UK Sales Executive
EC Terra: Dusan Tanaskovic, ECTerra Resource Geologist
Cost Complimentary (lunch and snack food included)
Evening drinks provided after the seminar
Who should attend? Geology and mining engineers, academics and students
RSVP By Monday 21 March 2011 to Andy Rogers on +44 (0) 203 176 0080 or arogers@micromine.com; or Dusan Tanaskovic at EC Terra on +38 (0) 6333 9199 or dusan@ecterra.de

Mineralised bodies and fault system

AGENDA		am	pm
9.00am	Introduction		12.15pm Lunch break
9.20am	New resource classification techniques		1.15pm The use of 3D modelling software for JORC/CIM compliant resource and reserve estimation and pit optimisation
9.40am	Data management & GIS		2.15pm The use of mine design and mine scheduling tools
10.30am	Coffee break		3.45pm Mine production management reporting: tools used for increasing operational efficiency, tracking material movements and improving safety
11.00am	The use of 3D modelling software for data handling, GIS integration, drill hole display and interpretation		4.15pm Questions and networking

About MICROMINE...

MICROMINE is a leading provider of intuitive software solutions for every stage of the exploration and mining process. MICROMINE understands the software and consultancy needs of operations around the world. Located in 18 of the world's major mining capitals, our team is close to clients' operations. This means MICROMINE can provide local supports and services in your language and time zone.

About EC Terra...

Please view the EC Terra website for further information www.ecterra.de.

To attend the one day seminar...

Please contact Andy from Micromine on +44 (0) 203 176 0080 or arogers@micromine.com; or Dusan from EC Terra on +38 (0) 6333 9199 or dusan@ecterra.de by Monday 21 March 2011.
